

# Managed traffic solutions

## Public transport connections

### Voices of the community

Feedback from the community has indicated that improved public transport access in the area and a bus route which connects Northeast Business Park to existing train and bus systems is needed.

Community respondents cited that limited public transport provision in the area created difficulties for the community to participate in employment, social and recreational pursuits.

### Getting there and getting around

Detailed public transport planning is essential to move people easily and safely in and around Northeast Business Park. Connections to Caboolture Town Centre, Morayfield, bus and train stations and surrounding suburbs are also being considered.

These connections will offer the community flexibility, accessibility and choice for their commuting needs.

### Proposed public transport route

Community concerns and suggestions raised in the consultation process have been provided to the project team to inform traffic planning, proposed design and infrastructure needs. Ongoing discussion with key stakeholders will help to shape the final plan.
